

GODDESS GUIDE: WHAT MEN FIND MOST FULFILLING IN SEX

Every woman can be super desirable and sexy, regardless of her shape, size or age. This is the truth as told by men. 100% of men surveyed nationwide confirmed that the single greatest factor that determines an amazing sexual experience for him is the extent to which the woman is "into it".

What completely turns your man on, more than anything else, is when his female companion is uninhibited, enjoying herself while making love. Virtually every man wants to know that there is no place else you'd rather be than with him, in that moment, making love.

Men care less about cellulite and breast size while making love. The only thing your lover sees while making love to you is your female body parts... and they are perfect. When you are making love with your partner, try to relax in the assurance that you are loved and appreciated just exactly as you are. What detracts from enjoying sex, on the other hand, is a woman who is non-responsive, inhibited, and critical about her body.

It's not body shape and breast size, or even sexual expertise when it comes to making love, **responsiveness** is what men find most fulfilling.

So turn on the lights ladies, it's time to celebrate your body and enjoy your sexual, feminine nature. Trust you are beautiful in the eyes of your lover and relax in the assurance that your body is a perfectly sensual & fantastically feminine just as it is and enjoy every inch and jiggle of it - now that's sexy!
